

# Desktop Voice, Video & Messaging

Stay connected and collaborate with your NIH colleagues anytime, anywhere with our voice, video, and messaging tools for your desktop.

## OFFERINGS

### **Voice Service**

Our enterprise voice service integrates our NIH telephone and computer services, providing point-to-point voice and video calls, teleconferences, voicemail, and international calling, just to name a few features.

### **Instant Messaging**

We provide you with instant messaging services through Skype for Business, Webex, and Cisco Jabber platforms. These services allow you to collaborate with colleagues via chat or share files in real time.

### **Email**

We provide the infrastructure, services, and support that allow NIH users to email colleagues internally and around the world.

### **Communication Tools for the Deaf & Hard of Hearing**

NexTalk, Video Relay Service (VRS), and Accessaphone reduce communication barriers and enable individuals who are deaf or hard of hearing to enjoy improved access to communication.
